

**Good Night**

Magnetic Fridge Texting

Pop-up Research\*

Keeping project grounded in transformational game

**My Contribution + Key Team Efforts:**

Developed what it means to use ambiguity effectively\*

Simplifying features of game based feedback

Helping moderate user testing

Rapid physical prototyping\*

Creating deliverables that explain, design, present,

and connection to theory

**Lessons:**

Agood starting point when looking at user testing is to see which

understands

modalities confuse them and which ones they use intuitively

likely vice-versa) can be an effective way to engage users from the

Bringing familiar aspects from the digital to the physical world (and

get - go

verifying factor such as a time-limit or a verifying

Giving a user creative freedom is good as long as you avoid

breadth of options

As a follow-up to the above point, don't make the user organize

things in the head, have the interface being organized intuitively for

then
